Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Upon reconsideration and in view of the different issues involved between article claims and method claims, the following restriction requirement is made:

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-3 and 16-21, drawn to a pasta product and container, classified in class 426, subclass 113.
- II. Claim 14, 15, and ²²⁻27, drawn to a method of preparing pasta, classified in class 426, subclass 234.

The inventions are related as product and process of use.

The inventions are distinct each from the other because the article as claimed in Group I could be used in a process other than that as claimed in Group II. For example, as applicants themselves have pointed out, it is well known to merchandise a package of food wherein the food is placed in another cooking utensil and it is also known to add hot water to reconstitute food. The product of Group I could be used in these ways. Therefore, the product of Group I does not require the microwave heating of the food in the container with the top off.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art requiring separate searches as shown by their different classification, restriction is proper.

To expedite prosecution, it is noted that the amendment has added quite a few new limitations, not previously recited. These limitations are being presented as apparently contributing to patentability. Are applicants implying they are the first to provide a container with a flanged rim or add a de-nesting lug to a container wall? Applicants are requested to submit any references they are aware of relative to the new limitations.
